SUMMARY

With 2+ years experienced developing many websites, interested in front-end, back-end or full-stack developer position. An active man with critical thinking, great time management, and strong leadership, that helps me in a single project or collaborate in a team project. A fast learner that likes to explore new things and gaining new experiences.

EXPERIENCE

Partnersip Project Program   02/2023 - 06/2023
Baitul 'Ilmi Educational Institution

Creating the School Profile Website & System.

- Interactive Home Page, User-Friendly Navigation, Academic Information and Resources, News and Events, Online Admission and Enrollment, Alumni Network and Resources.
- Data management system with admin page for Enrollment, Alumni, News and Events control.

Website Projects   07/2022 - 06/2023
IDN Boarding School

- Uplifting Tales, a platform dedicated to sharing and celebrating inspirational stories that uplift the soul from around the world. Laravel & Tailwind based project.
- Movie Listing Database, a platform to search structured collection of data that contains information about movies and make your movie playlist & watchlist. React.js & MongoDB based project.
- Warehouse Inventory Management, comprehensive system designed to efficiently track, organize, and manage inventory within a warehouse or distribution center. Laravel & Bootstrap based project.
- Prayer Time Tracker, system to assist individuals in managing their daily prayer schedules effectively. Vanilla Javascript with Public API based project.
- To-Do Modern List, a simple and intuitive tool designed to help users organize their tasks and manage their daily activities efficiently. Vanilla Javascript & Tailwind based project.

Website Development Trainer   08/2022 - 08/2022
Insan Mulia Educational Institution

- Developed and delivered a comprehensive web development workshop for a group of ±20 high school students.
- Designed and executed the fundamentals of HTML, CSS, and JavaScript, ensuring a structured and engaging learning experience.
- Received positive feedback from participants, highlighting the clarity of instruction, increased confidence in their web development skills, and the pride they felt in their web creations.

Open a Youtube Live Webinar   04/2022 - 04/2022
Weekend Tech Talk Series

- I had the privilege of attending an insightful and impactful webinar on Web Designing.
- Designed and executed the fundamentals of HTML, CSS, and JavaScript, ensuring a structured and engaging learning experience.
- The content was thoughtfully organized, allowing participants to grasp complex concepts and gain practical insights of Web Layouting.

EDUCATION
